### Rosemount E-Series Magnetic Flowmeter Transmitters

#### Technology that Makes a Difference

The Rosemount E-Series Magnetic Flowmeter Transmitters have multiple diagnostics available. Best-in-Class performance coupled with advanced diagnostics provide unparalleled process management capabilities. With an optional backlit Local Operator Interface (LOI), configuration changes and adjustments can be accomplished even in hazardous locations without exposing the electronics to the environment.

- Advanced diagnostics give unparalleled information about process conditions and meter performance.
- Dual compartment housing design that meets the most stringent international standards and ensures reliability in any environment.
- Isolated Local Operator Interface (LOI) makes changes in the field safe and easy.
- Available in an integral or remote mount design.

#### VIDEO DEMONSTRATIONS

*Rosemount E-Series Magnetic Flowmeter with Smart Meter Verification*  
Trevor Ball explains and demonstrates Emerson Smart Meter Verification and the benefits that can be realized by using this technology with Rosemount E-Series Magnetic Flowmeters. [5:50]
