

# SIT65 Satellite Internet Telemetry: How it Works

## Transmittal of Monitoring Data & Controls:

1. Data is gathered by sensors.
2. Data is collected by SIT65.
3. SIT65 antenna transmits data to satellite.
4. Data is transmitted to ground station receptor.
5. Data is transferred to internet.
6. Data can be viewed and downloaded from your web browser, and alarm messages can be received by email and text messages.
7. Commands can be emailed to the SIT65 to set controls via satellite.
